

Choosing the Right SaaS for Your Business

A Practical Guide to Selecting a Scalable Solution

♦ What This Guide Covers:

-  Key Questions to Ask Before You Buy
 -  Feature Comparison Worksheet
 -  Integration & Security Checklist
 -  Scalability Scenarios
 -  Implementation Best Practices
-

5 Mistakes to Avoid in SaaS Selection

1. Choosing Based on Features, Not Fit

Focus on *use case alignment*, not bloated dashboards.

2. Underestimating Implementation Complexity

Ask for **deployment timelines** and **training plans** upfront.

3. Ignoring Integration Needs

Ensure the platform plays nicely with your **existing data stack**.

4. Skipping ROI Modeling

Cost is only half the story — value is the other.

5. Falling for Shiny Logos

Big names don't always mean best fit. Choose based on outcomes.

Voxvita's SaaS Scoring Framework

Use our 7-point evaluation model to compare vendors side-by-side:

Criteria	Weight	Notes
Workflow Fit	25%	How well does it match your ops?
User Experience (UX)	15%	Intuitive for real users?
Integration Capability	15%	Connects with ERP/CRM/tools?
Support & Documentation	10%	Can your team self-solve?
Security & Compliance	15%	SOC2, GDPR, HIPAA, etc.
Scalability	10%	Will it grow with you?
Cost Transparency	10%	No hidden fees or lock-ins?
