📊 Data Solutions – FAQ

What are Voxvita's Data Solutions?

We offer services to clean, migrate, integrate, and standardize your data — especially when transitioning between systems.

What systems do you typically work with?

We support SAP, SQL, Access, Excel, cloud tools, and most ERP/CRM systems via structured import/export or custom scripting.

How do you ensure data accuracy during migration?

All data goes through pre-validation, test loads, error reviews, and final approvals before live deployment.

Is our data secure during the process?

Yes. All transfers are encrypted, with secure storage and audit logs. We comply with industry standards including HIPAA and SOC 2 (if required).

Can you help with data visualization or reporting?

Yes, we can deliver dashboards, structured exports, or prepare data for tools like Power BI or Tableau.

Do you handle recurring data syncs?

Yes. We offer one-time and scheduled syncing services depending on your operations.
