

Top 10 Automations to Save Time

Title: Top 10 Automations to Save Time

Subtitle: High-Impact Workflows for Every Business

1. **Email to Google Sheets Parser**

Automatically extract structured data from incoming emails into spreadsheets.

2. **Excel-to-Database Sync**

Schedule Excel data pushes into MySQL or Postgres for daily analysis or backups.

3. **Calendar → Task List Integration**

Auto-create tasks in your project system from events tagged in your calendar.

4. **Ticket Auto-Triage**

Tag and route support requests based on subject lines or keywords.

5. **Lead Alerts via SMS**

Get an instant text message when a form or CRM lead hits a specific score.

6. **File Upload + Notifications**

Trigger team alerts when new files are dropped into a shared folder.

7. **Auto-Invoicing**

Send templated invoices as soon as a job status changes to “Completed.”

8. **Form to CRM Contact**

Convert any website inquiry into a CRM contact, tagged and categorized.

9. **Weekly Reports Generator**

Compile and email dashboards or exports on autopilot every Monday.

10. **Dynamic Document Merge**

Generate proposals, contracts, or letters from client input fields.
