🔄 XL2SAP Toolkit – New Client FAQ

What is XL2SAP?

XL2SAP is our proprietary toolkit that turns structured Excel data into SAP-ready formats with minimal effort or scripting.

What SAP modules does it support?

We support most common modules including MM, PM, SD, FI, and CO — covering master data and transactional records.

Do I need to install anything?

No local installation required. We provide a browser-based version or can embed the tool inside your existing SAP-friendly environment.

How fast can we start using it?

Many clients are live within 48 hours using their own spreadsheets.

Can I automate the upload process to SAP?

Yes, XL2SAP integrates with LSMW, BAPIs, or custom Z programs for upload automation.

What if our spreadsheets are inconsistent?

We help standardize your data inputs, so XL2SAP works with minimal rework.
